METPOST WEDGE GRIP

Post Size	Method	Fixing	Colour
3" x 3"	24" Spike	Wedge	Red
4" x 4"	30" Spike	Wedge	Red

To put up a fence which has durability and gale beating strength use

The original Metpost Post Supports are designed to allow the erection of fence posts in minutes without the need for digging holes or mixing concrete. Drive the Metpost Post Support into the ground with a sledge hammer and the 4-fin steel spike will provide secure anchorage. Two types of post grip are available, Wedge Grip and System 2. Manufactured from heavy gauge steel, they are available with a red oxide coating which can be painted to match your fence or in a galvanised finish. The Metpost holds fence posts above ground level to protect against rot and ensure a long life.

WHY METPOST?

- Saves you money** - Use 2ft shorter posts
- Saves you time** - Quick and easy to use
- Saves you effort** - No digging, no concreting
- Lasts Longer** - Gale beating stability
Protects fence posts against rot and decay

- VERSATILITY** - Takes 4mm variation in post sizes
- EASE OF USE** - Twin bolt system allows easy installation and removal of posts
- DURABILITY** - Available in a specially formulated durable red oxide finish
- SOLIDITY** - Wedge Grip holds post in vice-like grip. No nails or screws required
- STRENGTH** - Integral Spike to Box patented design
- STABILITY** - 4-fin spike provides secure, gale beating anchorage.
